

Cited Reference Search in Scopus

Scopus, the largest abstract and citation database of peer-reviewed literature, features smart tools to track, analyze and visualize research.

Scopus' 50 million records consist of:

- 29 million records, including references, going back to 1995 (84% include abstracts)
 - 21,000 titles from more than 5,000 international publishers
 - 5.5 million conference papers
 - “Articles-in-Press” from more than 3,850 journals and publishers
- 21 million pre-1996 records going back as far as 1823
- Scopus also cross-searches 25.2 million patents from five patent offices

Disambiguation....

Valid data = Valid metrics

Accurate attribution of research products is the most important first step in a citation analyses.

- Scholarly authors are assigned many identifiers such as Scopus Author ID, Web of Science Researcher ID, institutional ID's
- Scholars should register for an [ORCID](#) - Open Researcher Identifier – this ID is supported by many publishers & platforms.
- Scholars can claim and make public their Google Scholar profile

More than one author profile

- Occasionally an author will have more than one profile
- What to do??
 - Authors should use an ORCID to uniquely identify their works.
 - Authors (or librarians) can request to merge author profiles in Scopus – be very careful about correct attribution of works!

Multiple Author Profiles

In this case, an author has more than one Scopus profile...
